Results-driven IT Project Manager with 15+ years of experience delivering high-impact software products in AI, mobile, and enterprise domains. Led the end-to-end delivery of Samsung Galaxy AI features and a full-featured video editor, managing large cross-functional teams across multiple concurrent projects. Skilled in Agile frameworks (Scrum and Kanban), stakeholder management, and bridging technical and business perspectives. Pursuing an MBA in Artificial Intelligence and Big Data at USP ICMC to deepen strategic and technical expertise.

Work Experience

• SiDi – Samsung Brazil R&D Center

2021 – Present

Project Manager

- Reported directly to the Project Sponsor in South Korea, maintaining strategic alignment between Brazilian R&D operations and Samsung HQ.
- Contributed to roadmap definition and product strategy in direct collaboration with Samsung Korea stakeholders.
- Traveled to Samsung HQ in South Korea on four occasions to align on project strategy, roadmap priorities, and executive stakeholder expectations.
- Led simultaneous end-to-end delivery of multiple complex software projects within the Samsung ecosystem, including AI-powered audio processing and mobile video editing products
- **IT Technical Project Management** | 5 years: PMO methodologies, governance, and best practices. Project scheduling and resource planning using Microsoft Project and Jira, Risk management, stakeholder communication, and delivery tracking.
- **Audio & Video Processing** | 5 years: Project Manager – Samsung Audio Eraser (Galaxy AI): Leading a 16-member team to deliver Samsung Audio Eraser (Galaxy AI), an AI-powered feature integrated into Samsung Apps. Managed end-to-end delivery of machine learning models capable of recognizing and isolating audio channels — voice, music, wind, crowd, traffic, and ambient noise — to enable precise noise removal and voice enhancement. Project Manager – Samsung Studio (Video Editor): Leading a 34-member team to deliver a full-featured video editor, managing end-to-end delivery across FFMPEG processing, audio waveforms, timeline/preview systems, and 15+ editing features including trim, slow motion, filters, subtitles, and geometric transformations.
- **Security & Encryption** | 2 years: Project Manager – Samsung Pass: Led a 7-member team to deliver Samsung Pass, a secure credential management solution for Samsung customers. Coordinated a cross-functional team to implement end-to-end encryption for sensitive user data — including passwords, addresses, and payment information — stored within Samsung's cloud infrastructure, ensuring compliance with data privacy and security standards.
- **Agile Frameworks** | 6 years: Leading cross-functional teams of up to 58 members using Scrum and Kanban methodologies. In Scrum environments, facilitated daily stand-ups, sprint planning, estimation, reviews, and retrospectives. In Kanban contexts, managed continuous flow through replenishment meetings and WIP limit controls.
- Responsible for budget planning and cost control across projects, including preparation of official RDA reports submitted to Brazil's Ministry of Science, Technology, and Innovation.

Technologies used: • Scrum • Kanban • Audio and Video Processing • Jira • Confluence • GitHub • Bitbucket • Architecture Review • APIs (including Json Files) • Cloud Service • VS Code • MS Project • Figma

- International Paper

2011 – 2021

Project Consultant

- Reported directly to the Project Sponsor at headquarters in Memphis, TN (USA), ensuring strategic alignment between local operations and global leadership. Traveled to the USA on four occasions for executive alignment and project reviews.
- Managed relationships with internal and external vendors, technical teams, and business stakeholders across multiple regions, driving product adoption and ensuring delivery success.
- **IT Project Management** | 5 years: PMO methodologies, governance, and best practices. Project scheduling and resource planning using Microsoft Project, Risk management, stakeholder communication, and delivery tracking.
- Led the planning and implementation of SAP HCM, managing a cross-functional team of 22 members to deliver HR process digitalization. Directed systemic adaptation to eSocial, ensuring regulatory compliance within government-mandated deadlines.
- Led the implementation of Brazil's General Data Protection Law (LGPD) and digital-signature platforms, ensuring organizational compliance within regulatory deadlines.

Technologies used: ● SAP ● Agile ● Waterfall ● Process Mapping ● MS Project ● Power BI ● LGPD & GDPR

- IBM do Brasil

2007 – 2011

Systems Analyst

- Provided Level 2 IT support on highly complex projects for international clients, managing escalated incidents and ensuring service continuity within strict SLA requirements.
- Implemented ITIL-based processes for incident management, governance, and support optimization, improving operational efficiency across cross-functional teams.
- Developed automation scripts using UNIX and PL/SQL to streamline repetitive processes and drive continuous improvement initiatives.

Technologies used: ● PL/SQL ● ITIL ● Shell Scripts (Unix) ● Process Automation ● Service Desk

Education

Master of Business Administration in Artificial Intelligence and Big Data
USP-ICMC São Carlos

Graduate Certificate in Privacy and Data Protection
FIA Business School

Bachelor of Science in Computer Engineering
Metrocamp IBMEC
